

Web User's Prayer

All: O God, source of the **world wide web** of life, You are always aware of our efforts, struggles, and limitations in this **human domain**. We come today with the busyness of our lives in which we hope to **network** with all of your creation.

- 1) **Preload** us with the desire to find You in our network contacts and in all of your world.
- 2) Grant us the gifts to be attentive to your presence in our lives and in those with whom we journey through the **broad band** pathways of this universe.
- 3) Keep us always **online** with You and activate your **Divine GPS** so that we are never out of your sight while navigating our way through life.
- 4) Instill in us deep gratitude for the many ways you affirm us a your **“favorites”** whenever we carry out your mission.
- 5) Give us insight and wisdom every time we discern, **scan, click, and drag** our way through new challenges that call us to communication and transformation.
- 6) Though we may at times **log off** from You, never let us **shut down**.

All: We ask these blessings in the name of Jesus, the Divine Word and Faithful Message of God.

Amen.
